Preface vii

INTRODUCTION

Netherlands-Wetlands
by W. J. Wolff 1

CASE STUDIES

Coastal systems
Nutrient cycling and foodwebs in Dutch estuaries
by P. H. Nienhuis 15
The Dutch Wadden Sea: a changed ecosystem
by V. N. de Jonge, K. Essink & R. Boddeke 45
Salt marshes along the coast of The Netherlands
by J. P. Bakker, J. de Leeuw, K. S. Dijkema, P. C. Leendertse, H. H. T. Prins & J. Rozema 73

Large river systems
The rivers Rhine and Meuse in The Netherlands: present state and signs of ecological recovery
by W. Admiraal, G. van der Velde, H. Smit & W. G. Cazemier 97

Base-rich freshwater systems
An ecosystems approach to base-rich freshwater wetlands, with special reference to fenlands
by G. van Wirdum 129
The structure and function of fen lakes in relation to water table management in The Netherlands
by H. de Haan, L. van Liere, Sj. P. Klapwijk & E. van Donk 155
Wetlands of recent Dutch embankments
by W. Joenje & B. Verhoeven 179

Nutrient-poor freshwater systems
Nutrient-poor freshwater wetlands
by L. W. G. Higler 195
The Bourtanger Moor: endurance and vulnerability of a raised bog system
by W. A. Casparie 203
Hydrological differences between bogs and bog-relicts and consequences for bog restoration
by J. M. Schouwenaars 217
Ecology and management of moorland pools: balancing acidification and eutrophication
by H. van Dam & R. F. M. Buskens 225

Stream valleys as wetlands
by L. W. G. Higler & P. F. M. Verdonschot 265
Wet dune slacks: decline and new opportunities
by H. W. J. van Dijk & A. P. Grootjans 281

ECOLOGY, CONSERVATION, MANAGEMENT, RESEARCH AND POLICY

The ecology of The Netherlands wetlands: characteristics, threats, prospects and perspectives for ecological research
by E. P. H. Best, J. T. A. Verhoeven & W. J. Wolff 305
Wetlands policy of the Dutch government: failure or success?
by F. Colijn, R. Uyterlinde & H. W. Kroes 321
